Introducing Our IVF Financial Share Program

Another Way to Make Getting Care Easier and Improve the Chance of Success with IVF

Through this program and our partnership with In Vitro Sciences, we can help reduce anxiety about fees and outcomes for IVF. The fact is, people who have the ability to undergo multiple IVF cycles may increase their chance of success over time. Our program limits the amount of money at stake for the comprehensive treatment plan and provides a **guaranteed refund of 70%** should the IVF treatment fail.

How Does The Program Work?

If eligible, patients may attempt up to 3 fresh IVF cycles and 3 frozen embryo transfer (FET) cycles* for an upfront, fixed, and discounted fee. If they take a baby home after any of the 6 attempts, In Vitro Sciences (the administrator of this program) retains the full fee. If treatment is not successful, **70% of the fee will be refunded**, leaving resources for other family building options.

(*Note: the 3 FET cycles must be from embryos created in the 3 fresh cycles).

The Benefits for Your Patients

The IVF Financial Share Program improves chances of success with IVF by helping patients commit to a multi-cycle treatment package. This commitment also minimizes the financial risk by **fixing the cost of treatment AND providing a refund if treatment is not successful**. So, with this program IVF will have a better chance for success – and financial resources will also be preserved for other family building options should IVF fail.

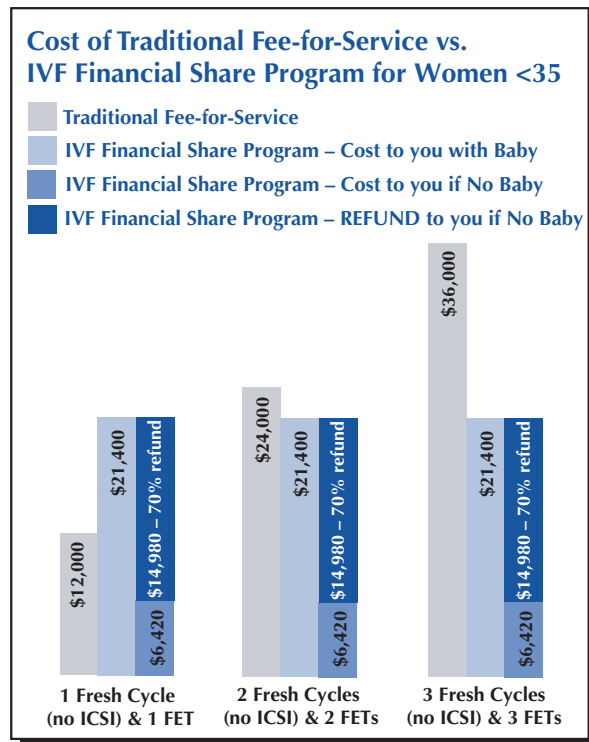

How To Qualify for This Program?

Acceptance into this program is at the discretion of In Vitro Sciences and is based on established medical require-

ments. To qualify for this program, patients must self-pay patients and be considered appropriate candidates for IVF. There will be a detailed review of infertility and medical history. Women using their own eggs must complete all three fresh cycles by their 38th birthday. If donor eggs are being used, the donor must meet The Center's screening criteria.

What Is the Cost of the Program?

The cost of this program varies depending on the woman's age and the treatment type. For example, in women under 35 shown below, a typical IVF fresh cycle and FET cycle (no ICSI) costs about \$12,000 and the IVF Financial Share Program fee is \$21,400. Other variables within this Program should be discussed with a Financial Counselor at The Center.

Please remember to visit our website at: www.fertilitycenter-uconn.org

Costs not included in the IVF Financial Share Program

- Normal IVF prescreening tests
- Medications associated with treatment
- Any non IVF-related surgeries (e.g. operative laparoscopy or D&C)
- The cost for obtaining donor sperm
- Co-Culture
- Anesthesia services
- When using donor eggs, recruitment and screening costs, and donor fees
- Cryopreservation and storage of excess embryos
- Monitoring blood work
