

Center for Advanced Reproductive Services

IVF is expensive. We have partnered with Ferring Pharmaceuticals in a clinical drug trial offering a compensated IVF cycle including IVF medications. We are looking for participants. If you meet the initial criteria below, please tell your doctor that you are interested in the RITA study.

1. Age 18 to 42
2. Premenopausal
3. Body mass index (BMI) between 17.5 and 38.0 kg/m²
4. Documented history of infertility for at least 12 months if between ages 35 and 42 or six months if between ages 18 and 34
5. Regular menstrual cycles at 24 - 35 day interval
6. A maximum of one previous IVF cycle
7. Willing to accept single blastocyst transfer
8. Willing to attend all appointments and participate with follow-up phone calls

If you feel you meet these criteria and are interested in learning more, we are happy to talk to you at your next visit.

For a full list of eligibility criteria visit clinicaltrials.gov at **RITA Study**. You can also contact Scott, our Clinical Research Manager at myohe@uconnfertility.com.
