Announcing New Hamden Facility

John C. Nulsen, M.D., Donald B. Maier, M.D., Claudio Benadiva, M.D.

As a continuation of our efforts to be among the largest and most successful fertility programs in the state, we are pleased to introduce our new facility in Hamden, and, our new associate, Dr. David Schmidt.

By expanding our services to all parts of the state, we'll enable more couples to gain access to the latest infertility treatments. They will receive the most appropriate medical care in a caring and supportive environment that is sensitive to patient's needs.

Since fertility treatments often require many visits, we've centrally located our new Hamden office right on Whitney Avenue, convenient from both I-91 and Rt. 15. With this new office, couples from Southern Connecticut can now receive much of their care closer to their home or work.

Within our Farmington and Hamden state-of-the-art facilities, we offer a wide range of services—from initial treatments to the very advanced.

In our Hamden office, our services include:

- Office visits for initial infertility consults, IVF consults, follow-ups, pre- and post-operative visits, and psychological and support visits
- IVF cycle monitoring, trial transfers, and pregnancy ultrasounds
- IUI cycles and sperm washes
- Diagnostic testing including sonohysterograms, endometrial biopsies, and HSG's
- Education classes for IVF, injection teaching and other seminars

Our Farmington office, located minutes off I-84 on the University of Connecticut Health Center campus, is a full-service facility offering the following additional services to patients:

- All retrievals and transfers
- All IVF laboratory procedures
- All andrology testing

All surgical and hospital procedures are performed at either John Dempsey Hospital's Same Day Surgery Center right next door to the Farmington office, or at New Britain General Hospital.

We believe that with this new site, and with Dr. David Schmidt's expertise, we can continue our tradition of being among the largest and most successful fertility programs in the state.

For more information about our programs in Hamden, or to set up an appointment with Dr. Schmidt, please call our Farmington office at 860.679.4580 or Dr. Schmidt at 203.230.4400.

David W. Schmidt, MD *Hamden Lead Physician*

In Hamden, you will be working with our lead physician, Dr. David Schmidt. Dr. Schmidt is a candidate for Board Certification in Obstetrics & Gynecology and Reproductive Endocrinology & Infertility (REI). He has specialized in

Reproductive Endocrinology since 2001.

Dr. Schmidt is a well-established and respected member of the University of Connecticut Health Center Community. He graduated from the University of Connecticut School of Medicine in 1997 and completed his obstetrics and Gynecology residency at the UConn Health Center where he distinguished himself as the recipient of several awards for outstanding clinical and teaching skills. Dr. Schmidt recently completed a three-year REI fellowship at the University of Connecticut Health Center at The Center for Advanced Reproductive Services. During that time, Dr. Schmidt established himself as an accomplished and compassionate clinician, leader among his peers, and dedicated academic.

In addition to being an Assistant Clinical Professor of Obstetrics & Gynecology at the University of Connecticut Health Center, Dr. Schmidt has special interests in IVF, ovulation induction, endoscopic surgery and research. Several of Dr. Schmidt's research projects have been accepted for national publication or presentation. He has also been awarded the Dorfman Award for Excellence in Patient Care, the Alumni Award for Excellence in Undergraduate Teaching, and the Dr. Spero Neckles Award for Outstanding Resident Research.
