

# Possibility Plan for Gonadotropin IUI: Expanded Monitoring

Access to the care you need.

If you do not have insurance or have insurance but lack coverage for Intrauterine Insemination (IUI) and are concerned about the cost of this procedure, The Center for Advanced Reproductive Services has developed a Gonadotropin IUI: Expanded Monitoring Case Rate. This Case Rate includes the procedures in your Gonadotropin IUI treatment plan specifically for you. Eligibility for this Case Rate is determined when our financial counselor verifies benefits with your insurance plan and it is determined that you do not have IUI coverage for the services included in the Case Rate.

## Do I Qualify?

To qualify for non-IVF Possibility Programs, patients must not have insurance; have insurance but lack infertility coverage; and have a household income (single or couple) of less than \$175,001.

All participants in any Possibility Plan must sign Possibility Plan Case Rate Waiver. All blood work must be drawn in Farmington, Hartford or Branford locations.

The \$3,975 Case Rate includes the following services:

- Endocrine testing (unlimited)
- Ultrasound monitoring (unlimited)
- Cycle monitoring
- Intrauterine insemination
- Sperm preparation

## Canceled Cycles:

In the event of a cancelled cycle all services will revert to fee-for-service billing with a 20% discount and will be deducted from the original amount. The balance will be refunded.

## Fertility Medications:

Fertility medication costs are not included. However, through our special relationship with the New Life Program and specific fertility drug manufacturers as well as other cost saving programs, you will have access to medication savings ranging from \$300-\$600 per cycle. In addition, compassionate care medications are available for those who financially qualify.

*Imagine the possibilities...*

Note: Prices subject to change.  
The Center reserves right to end  
program at any time.
